## WELCOME MESSAGES

Assalamualaikum Warahmatullahi Wabarakatuh.

Infinite gratitude and praise be unto Allah. The Neurology landscape in 2024 is poised for significant transformation, driven by recent studies reflecting the rapid advancement of knowledge in the field. Subspecialties like Neurovascular and Neurorestoration are progressing even faster. Guidelines and Consensus in 2024 are likely to undergo swift changes, refining their predecessors. The implementation of guidelines has proven to be cost-effective and ensures therapeutic efficacy. However, globally oriented guidelines may not seamlessly apply at the domestic level, necessitating policies and wisdom for implementation in Indonesia. Perhimpunan Dokter Spesialis Neurologi Indonesia (PERDOSNI) plays a crucial role in realizing these objectives.

Pertemuan Ilmiah Nasional (PIN) organized by PERDOSNI, scheduled for May 30 to June 2 in Surabaya, will delve into the latest developments in Neurovascular disciplines (Stroke and vessel, Neurointervention, Neuroimaging, Neuro-otology, and Neuro-ophthalmology), Neurorestoration & Neuroengineering, Neuroepidemiology, as well as Law and Ethics. The theme for PIN PERDOSNI 2024 is "Unlocking Recent Evidence and Practice Guideline: Bridging the Gap within the Indonesian Context."

The Surabaya committee in May 2024 will warmly welcome and facilitate various scientific discussions encompassed in symposiums, workshops, poster and oral presentations, as well as a neurovascular competition among neurology education centers in Indonesia.

Wishing you a fruitful participation in PIN PERDOSNI 2024 and a warm welcome to the Heroic City of Surabaya.

Wassalamu 'alaikum Warahmatullahi Wabarakatuh.

## WELCOME MESSAGES

Assalamualaikum Warahmatullahi Wabarakatuh

We give thanks for the presence of Allah SWT, for His grace and guidance so that we can still serve the community, especially in the field of neurological health in Indonesia. The Association of Indonesian Neurologists (PERDOSNI) will hold the PERDOSSI National Scientific Meeting (PIN) on 30th May - 2nd June 2024, in Surabaya with the theme Topics “Unlocking Recent Evidence and Practice Guidelines : Bridging the Gap with Indonesia context.”. The theme proposed by the committee is very appropriate in accordance with the development of neurology services which lately quite prosper and accelerate so agile.

This scientific activity is very important and beneficial for the cultivation of doctors, especially colleagues and neurologists throughout Indonesia. I am sure PIN PERDOSNI Surabaya 2024 will be very interesting because it has updated topics in the fields of stroke, neurointervention, neuroimaging, neurootology & neuroophthalmology, neurorestoration & neuroengineering, neuroepidemiology, and presented by national and international experts in their fields.

Finally, I would like to thank the committee and other parties who will be involved in this event, I hope we are all in good health and can participate directly at PIN PERDOSNI Surabaya 2024.

See you in Surabaya.

Wassalamualaikum Warahmatullahi Wabarakatuh

### Workshop 1 “Stroke and Vascular”

#### Home Care in Stroke Patients: Preparation to Practices

Thursday, May 30<sup>th</sup> 2024

TIME	PROGRAME
07.30 - 08.00	<b>Registration</b>
08.00 - 8.30	Assessment of Stroke Patients to Determine Home Care Services
08.30 - 09.00	Integrated and Multidisciplinary Home Care in Patients with Stroke
09.30 - 10.00	Role of Care Giver in Stroke Patient Home Care Services
10.00 - 10.15	<b>Coffee Break</b>
10.15 - 10.45	Role of Neurologist to Prepare of Care Giver on Home Care Stroke Services
10.45 - 11.15	Application of Medical Advanced in Home Care Focus in Total Dependent Patient
11.15 - 11.45	Determining Unit Cost in Home Care Stroke Services
11.45 - 13.00	<b>Prayer &amp; lunch break</b>
13.00 - 15.00	<b>TBA</b>

### Workshop 2 ”Neurointervention”

#### Neurointervention: Precision Diagnosis to Interventional Treatment

Thursday, May 30<sup>th</sup> 2024

TIME	PROGRAME
07.30 - 08.00	<b>Registration</b>
08.00 - 8.30	Understanding The Aneurysm Subtype and Interventional Strategies (Saccular, Dissection, Fusiform, Mycotic)
08.30 - 09.00	Cerebral Venous Anatomy and the Disease: Diagnosis and Neurointerventional Treatment (Learning from Cases)
09.00 - 09.30	Carotid Disease and Art of Intervention: Atherosclerotic, Web, Dissection
09.30 - 09.45	Discussion
09.45 - 10.00	<b>Coffee Break</b>
10.00 - 10.30	Brain AVM Embolization Using n-BCA: Selecting Concentration Dose and Mixing (Practical Use n-BCA And Lipiodol)
10.30 - 11.00	Understanding and Comparing Liquid Embolan: Glue and DMSO Based
11.00 - 11.30	Reconstruct CTA and MRA to Prepare Interventional Procedures from Raw Data: How does Free Software Help Us?
11.30 - 11.45	Discussion
11.45 - 13.00	<b>Prayer &amp; lunch break</b>
13.00 - 13.30	MRI Based Tretment on Stroke care (Hands On MRI case and Reconstruction on Works Station - 15 Work Station Available)a
13.30 - 14.00	Advancement in Neuro-intervention: Optimizing Stroke Management-one stop stroke services (CT scan on cathlab, 4D DSA, Fusion, Compress Artefact)
14.00 - 14.30	When your 3D DSA is not working in your cathlab: Neurointerventional Tips and Trics
14.30 - 14.45	<b>Coffee Break</b>
14.45 - 15.30	Flow Model: Coiling, Stenting, Flow Diverter, Thrombectomy Flow Model: Liquid Embolization, Balloon Embolization
